

SOFT HAND WEIGHTS

MADE FROM RECYCLED
THERMOPLASTIC OFFCUTS

SOFT HAND WEIGHTS

Manosplint® Soft Hand Weights are therapeutic tools used primarily in Hand Therapy. They are essentially weight “bean bags” designed to be held in the hand. They can help a patient recovering from a hand injury or surgery to build up strength, strengthen the wrist and forearm and improve endurance during repetitive therapy movements.

ECO FRIENDLY

Manosplint® Soft Hand Weights are made using recycled crumbs from hand therapy thermoplastic offcuts, helping to reduce plastic going to landfill.

SAFER THAN HARD WEIGHTS

The weights are soft which helps to protect patients and healthcare professionals from painful knocks if they are accidentally kicked or dropped. Also, they are brightly coloured, helping to prevent accidental collisions which are painful to the patient and staff.

KEY INFORMATION

- Made from recycled thermoplastic offcuts
- Wipe clean surface for easy cleaning
- Easy to hold with adjustable strap to hold the weight in the hand
- Multi-colours for easy identification
- Available individually or as a set of 4
