MAXM SKATE

Enhance your recovery journey

SMART KNEE REHAB

MAXM SKATE

Meet the knee recovery solution that's ready to roll whenever you are. The MAXM Skate, App and Sensor unite to expertly guide patients through a recovery program of pre- and post-surgery exercises. The evidence-based MAXM Skate is purpose designed to let patients recover with confidence.

Why choose the MAXM Skate for Knee Recovery?

Targeted rehabilitation:

✔ Designed to improve strength, mobility, and function after surgery or injury.

Expertly designed:

✔ Created by a leading orthopaedic surgeon, and endorsed by patients from all walks of life, the MAXM Skate Recovery Program gets you back to what you love.

Clinically proven:

✔ Studies show patients using MAXM Skate achieve greater range of motion and faster recovery than standard care.

Convenient:

✔ Lightweight, portable design means you can continue your rehab anywhere.

Professional support:

✔ Real-time progress shared with your care team for professional monitoring.

SURGEON DESIGNED RECOVERY

How does it work?

By combining the MAXM Skate device with the MAXM Skate App, patients receive real-time feedback on their range of motion, progress tracking, and personalised exercise support.

With its Bluetooth-enabled sensor, adjustable pulling rope, and QuickFit strap, easily set up and use in your own home - helping you stay consistent with your rehabilitation plan.

Enhance your recovery

The MAXM Skate is a cutting-edge rehabilitation device designed to accelerate recovery following surgery, knee replacements, or other major knee injuries.

Support your recovery and improve range of motion using this surgeon-designed range of motion device.
